## Purity Criteria

This product meets specific purity criteria (e.g. for heavy metals) and can therefore be used in regulated applications. The purity criteria were determined from mean values of arbitrarily selected samples. The data provided are therefore representative values and do not represent specifications. The analysis of these purity criteria is not part of our routine standard quality and production control.

## Amorphous structure

Synthetic amorphous silica manufactured by flame hydrolysis or by precipitation in an aqueous solution is characterized by its amorphous structure. The determination method used on typical samples is enrichment of the crystalline fraction followed by X-ray Diffraction. The detection limit of this method is less than 0.1% by weight. The determination of arbitrarily selected samples shows no crystalline fraction above the detection limit. Under consideration of this result above mentioned silica is considered to be amorphous.

## Safety of toys – directive 2009/48/EG, EN 71-3

Concerning the qualification for above mentioned application please visit the chapters 'Heavy metals' and 'Substance declaration'.

## Community eco-label to outdoor and indoor paints according to Commission Decision 2014/312/EU

Criterion 4 - Content of Volatile and Semi-volatile Organic Compounds (VOCs, SVOCs)

**The content of VOC's ( $\leq 0.4$  %) and SVOC's ( $\leq 0.1$  %) of this product were checked as mean-values of arbitrarily selected samples; they are therefore physical-chemical benchmarks (approximate values), and not specifications.**

The analysis on above mentioned substances is not part of our standard quality and production analyses. Therefore, we cannot warrant or guarantee the absence or level of these substances to any specific limit or threshold value.

Criterion 5 - Restriction of hazardous substances and mixtures

This product is not a hazardous substance and not listed as SVHC-Substance. Please visit the product safety information and safety data sheet for detailed information.

## More information regarding Regulation (EU) 10/2011

### • Declaration of compliance (DoC)

This product is in line with the specification and standards of Regulation (EU) 10/2011.

### More information regarding hydrophobic silica and Ordinance SR 817.023.21

The current version does not contain a particle specification for hydrophobic silica. From the Swiss authority (Eidgenössisches Departement des Innern EDI) we received the following statement:

The Commission Regulation (EU) 2016/1416 amending and correcting Regulation (EU) No 10/2011 on plastic materials and articles intended to come into contact with food, will be included in the next revision of the Ordinance.

The additive list from the EDI's old regulation on commodities (SR 817.023.21), in contrast to EU Regulation 10/2011 and the new Regulation (SR 817.023.21, Mai 2017), was not a "positive" list. It was not exhaustive and complete. A manufacturer could use an additive which is not listed in the current list if the general requirements (Art. 49 of the Food and Consumer Goods Ordinance SR 817.02) are met. An additive which is listed in Regulation 10/2011 (with its possible restrictions (SML, QM, etc.)) fulfils these requirements.
